

Sergei Stepanenko

Frontend Developer, 6+ years of commercial web development experience and deep UI/UX expertise. Specialized in building complex, interactive WYSIWYG form builders and diagram editors.

WORK EXPERIENCE

OptimaJet, Frontend Dev

08/2020 - 03/2026

FormEngine ↗ (Form/Survey/Website Builder)

Architected and developed an embeddable WYSIWYG form editor UI from scratch, implementing a plugin architecture for feature extensions. I designed high-performance table components for rendering large datasets and integrated 50+ UI components from MUI, Shadcn, and Ant. This optimized code rendering, cutting UI build times by 40% and increasing team productivity

WorkflowEngine ↗ (BPM Platform)

Redesign of the BPMN diagram builder and admin panel, managing the full UX cycle including metrics, user scenarios, and prototyping. I provided frontend support for international clients, translating feedback into technical requirements and creating documentation.

InferStat, Full-stack Dev

01/2019 - 08/2020

Infertrade ↗ (Financial Analytics Tool)

Executed a deep refactoring of the analytics platform UI, significantly improving frontend stability. I optimized client-side validation for instant feedback when entering complex formulas. I also implemented lazy loading and isolated plugin validation schemas, accelerating analytical dashboard initialization by 25%.

iSpring Solutions, Frontend Dev & UX Intern

07/2017 - 09/2018

iSpring Suite ↗ & **iSpring Learn** ↗ (E-learning Authoring Toolkit)

Migrated e-learning players from legacy Flash to HTML5/Canvas and SVG. I developed responsive course layouts, which drove a 25% increase in mobile views. I also conducted usability tests, user interviews, and mapped CJM for the cloud LMS.

EDUCATION, SKILLS

Bachelor of Science in Software Engineering

Volga Tech (PSTU) | 2015 – 2019

System Design Patterns Course

PS Institute | 2017

UX/UI Design Course

iSpring Institute | 2018

Hard Skills

TypeScript, JavaScript, React, Vue, Redux, MobX, SCSS, Vite, Webpack, Lerna, Node.js, Next.js, REST API, GraphQL, Docker, CI/CD, Jest, Playwright

AI

Cursor, Copilot, Agentic development, MCP, Agent orchestration, LLM API integration

UX/UI

Interviewing, UX research, Usability Testing, CJM, User Flows, Wireframing, Figma, ProtoPie, Webflow

Soft Skills

International Tech Support, Business Requirements Decomposition, Mentoring, Technical Documentation
